EXPERIENCE

Predictaf, Los Angeles, CA — *Full Stack Product Design Engineer* 2025 - Present

Design and ship end-to-end experiences for an agentic SaaS proptech platform, simplifying complex workflows and improving usability while reducing friction. **Lead** UX research and usability testing to uncover behavior patterns and translate insights into scalable information architecture, flows, and marketplace features through rapid prototyping. **Build** and maintain a design system across Figma and Storybook, ensuring consistency, accessibility, and parity with production. **Partner** closely with founders, product, and engineering to align design decisions with user needs, business goals, and scalability. **Develop** production-ready components that accelerate delivery and improve holistic quality.

Fabletics, Los Angeles, CA — *Sr. Product Designer, Growth* 2016 - 2023

Redesigned growth and onboarding funnels for a high-traffic e-commerce platform, driving a 30% increase in new customer conversions through usability improvements and experimentation. **Partnered** with product, engineering, marketing,

and analytics to launch multi-variant experiences that improved activation, retention, and engagement. **Leveraged** user research and A/B testing to guide product direction and align stakeholders. **Contributed** to scaling design systems for consistency, accessibility, and faster delivery across consumer-facing surfaces. **Led** UX improvements across transactional flows, balancing business goals, LTV, and performance.

Sony Pictures, Los Angeles, CA — *Interactive Designer, World Marketing* 2012 - 2016

Designed marketing digital worldwide campaigns from concept to completion, meeting strict film or television premiere deadlines and maintaining high brand standards. These initiatives helped set milestones for several film release box office records. **Evaluated** lift study measurements for campaign design and testing on upcoming films. **Iterated** on and improved the design of campaign assets based on weekly reports and media KPI's.
